Moscow, Russia

SUMMARY

Results-driven and seasoned DevOps Engineer with over 7 years of experience (since 2017) in designing, automating, and maintaining robust and scalable cloud-native infrastructure. Extensive expertise in multi-cloud environments (GCP, AWS, Azure, Yandex Cloud, VK Cloud) and on-premise solutions. Proven ability to architect and implement end-to-end CI/CD pipelines (Jenkins, GitLab CI) and manage full application lifecycle delivery. Adept at building and administering high-availability Kubernetes clusters, developing Helm charts, and promoting Infrastructure as Code (Terraform, Ansible) and GitOps methodologies to ensure consistent, reliable, and secure deployments. Brings deep knowledge of the entire DevOps toolchain, including Docker, Vault, and Vagrant.

EXPERIENCE

08/2023 - 06/2025

DevOps Engineer

ClearWay Integration

- Designed and implemented CI/CD pipelines in GitLab CI for automated software delivery.
- Spearheaded Jenkins installation, configuration, and ongoing administration.
- Developed standardized CI/CD pipelines using Jenkins Templating Engine (JTE) to enforce DevOps best practices.
- Built, configured, and managed production-grade Kubernetes clusters for container orchestration.
- Deployed and administered HashiCorp Vault for centralized and secure secrets management.

11/2020 - 04/2022

DevOps Engineer

TechnoDiasoft

- Full-Stack Automation: Developed and supported CI/CD pipelines in Jenkins (Groovy) and container orchestration on Kubernetes/OpenShift to enhance DevOps practices.
- Backend Development: Engineered a data aggregation application in Python, interacting with BitBucket REST API to collect and process commit metadata.
- Data Processing & Architecture: Implemented algorithms for data sorting, serialization, and asynchronous operations using AsyncIO and Celery.
- Database Management: Designed the database schema and implemented data access layers using SQLAlchemy ORM with PostgreSQL.
- Infrastructure as Code (IaC): Automated Kubernetes deployments by authoring Helm charts and Docker images for application containerization.

EDUCATION

Udemy

CERTIFICATES

06/2021 - Present

Python Programming

Netology - Test knowledges about programming on Python

01/2019 - Present

[Swift programming](#)
Udemy - Finished Lessons about Programming on Swift

01/2019 - Present

[Java Advanced](#)
Udemy - Finished Lessons about Java Advanced

SKILLS

Web Development	Intermediate	Python programming	Intermediate
C/C++ Programming	Basic	Linux Administrative	Advanced
NodeJS Programming	Basic	CI/CD	Expert
Java Programming	Basic	DevOps	Advanced
golang programming	Basic		

LANGUAGES

Russian	Native	English	Intermediate
